

printBlock

```
graph LR; A[printBlock] --> B[RecordBuffer::getKey]
```

A diagram showing a call from the `printBlock` function to the `RecordBuffer::getKey` method. The `printBlock` node is a gray rectangle on the left, and the `RecordBuffer::getKey` node is a white rectangle on the right. A blue arrow points from the right side of the `printBlock` node to the left side of the `RecordBuffer::getKey` node.

RecordBuffer::getKey
